

# DATAVARD OUTBOARD HOUSEKEEPING

Taking out the trash  
data in SAP landscapes

## KEY BENEFITS

### SAVES TIME AND EFFORT

Quick set up and easy maintenance and ongoing housekeeping across the SAP landscape

### LOWERS TCO

Shrinks the footprint of your entire SAP landscape to lower costs

### IMPROVES PERFORMANCE

Speeds up SAP system navigation, reporting and loading - no trash data to slow things down

### ALWAYS UPDATED

Updates more than 60 housekeeping activities based on the latest SAP notes every three months

**OUTBOARD  
HOUSEKEEPING™**

## REAL EFFECT OF OUTBOARD HOUSEKEEPING

Did you know that as much as 35% of SAP BW data is temporary and should be deleted? This is not only polluting SAP with no-value data but also slows down the performance of SAP systems. HeidelbergCement, one of the world's largest building material suppliers has reduced the size of their SAP landscape consisting of seven BW systems by 15 TB initially. By using automatic ongoing housekeeping, their SAP BW team saves six hours of effort every week.

## WHAT IS OUTBOARD HOUSEKEEPING?

Every SAP system generates data that loses value quickly after its creation. All kind of logs, documents and staging data are created and should be deleted on a regular basis. Often, we see SAP systems polluted with no-value data due to a lack of resources to perform regular deletion of aged temporary data. The benefits of automated housekeeping in a complex SAP landscape consisting of ERP, BW, CRM, SRM, HANA and other landscapes include reduced TCO for storage and ongoing maintenance along with improved system performance across the board.

OutBoard HouseKeeping is an ABAP based solution that deletes SAP temporary data safely using RecycleBin, pre-delivered housekeeping objects and provides framework for automated housekeeping of complex landscapes from one central system.

## HIGHLIGHTS

- Automatic deletion of aged no-value or trash SAP data
- Set up once and schedule everywhere across the SAP landscape
- Remove data safely with RecycleBin
- Includes 60+ housekeeping objects
- HANA sizing and system evaluation
- Future-ready with HANA specific housekeeping
- Adjustable for custom tables and scheduling of custom reports
