

# DATAVARD INSIGHTS™

What is going on  
in your SAP® system?

## HIGHLIGHTS

Datavard's solution for IT Operations Analytics (ITOA): real-time user behavior, data and system insights into action

Get the immediate benefits of:

- Detailed insight into user behavior and application usage
- Better planning and disaster prevention through simulation, prediction and alerting
- Take actions based on deep-dive data and system insights
- Data management, system usage and performance trends visualizations
- Learn Big Data in a familiar environment

**DATAVARD  
INSIGHTS™**

**SAP® Certified**  
Built on SAP Cloud Platform

## SIMULATE DATA GROWTH AND USER BEHAVIOR

Your organization is growing and opening new locations, onboarding new people, or planning changes to the infrastructure? Use Datavard Insights™ to simulate all possible scenarios. See how changes, like adding more users for a critical application or data growth, can impact a system's performance and make informed decisions for increasing speed and capacity.

## TURN INSIGHT INTO ACTION: PREDICT TRENDS AND MAKE THE RIGHT DECISIONS

Accurate predictive analytics is key to successful business strategies and investments. Manage your IT like a business and make sure your decisions are based on a complete view of your data, how it's used, system capacity and other details.

## BE PROACTIVE: MANAGE THREATS BEFORE DISASTER STRIKES

Get into the driver's seat and switch from disaster recovery to no more disasters! You have enough of data in your system to predict and avoid future downtimes. The key is continuous and comprehensive real-time system analysis, benchmarking and knowing, when to react. Define your most critical KPIs to alert you before it is too late. Know, what is going on in your system, all the time, in real-time.

## DATAVARD'S SOLUTION FOR ITOA:

- Discover new ways of analyzing application usage and system performance
- Predict data and system growth
- Verify the impact on systems performance
- Understand and analyze user behavior
- Reveal trends and patterns in your system and data
- Take appropriate actions directly from the analysis
- Pinpoint root causes of downtime
- SDK for customization in addition to 300+ predefined KPIs for benchmarking and best practices alerting
- Intuitive and easy-to-use FIORI Frontend
- Developed on SAP® Cloud Platform
